

Artificial Intelligence

Artificial Intelligence (AI) is a field of computer science that focuses on building systems capable of performing tasks that normally require human intelligence.

Main Applications

Image Recognition

Natural Language Processing

Recommendation Systems

Robotics

Machine Learning

Machine Learning is a branch of AI where computers learn patterns from data without being explicitly programmed.

Deep Learning

Deep Learning is a subset of Machine Learning that uses neural networks with multiple layers to solve complex problems.

Common Programming Languages

Python

Java

C++

Summary

Artificial Intelligence helps automate tasks, analyze data, and support decision-making in many fields.
